ZHENQI CAI

Senior Product Designer	zhenqicai0603@gmail.com	+1 (669) 243-5784	www.zhenqicai.com

(01) Summary

Senior Product Designer with 7+ years of experience designing complex systems from 0-to-1 to global scale, with a focus on AI-enabled products and human decision-making. I turn complex system behavior, policies, and workflows into clear, trustworthy experiences that drive confident decisions and measurable impact.

(02) Experience

Amazon — UX Designer II — New York, NY — Nov 2022 - May 2026

Seller Qualification System

- Identified sequential enforcement as the root cause of seller drop-offs, reframing the problem from incremental UX improvements to a scalable system redesign.
- Led cross-functional alignment to launch a parallel qualification model, improving completion by ~20%, reducing onboarding from 30 to 5 days, and achieving a 4.33/5 usability score.

GPSR Compliance System

- Designed a scalable compliance experience supporting 100M+ product pages, driving a 67% user preference in A/B testing.
- Identified a critical gap in user understanding (2.3/5) and reframed the problem from visibility to comprehension, creating reusable interaction patterns across similar compliance experiences.

Stonk Tech — Founding Product & Brand Designer — Remote — Apr 2022 - Nov 2022

- Designed the end-to-end experience for a 0-to-1 fintech platform, translating complex financial concepts into intuitive, trust-building customer journeys.
- Built the brand identity and landing page for a 0-to-1 fintech platform, strengthening early credibility and helping attract seven-figure investment.

Weee! — Product Designer — Fremont, CA — Sep 2021 - Mar 2022

- Designed an on-demand delivery experience that helped users understand operational constraints rather than hide them, validated through 8-participant usability testing.
- Shipped the feature, increasing on-demand GMV by 13.9%, first-time buyers by 7.8%, and active buyers by 6.4% week over week.

SAP — UX Design Intern, Design System — Palo Alto, CA — Jan 2020 - Sep 2021

- Redesigned SAP Fiori data tables, shipping sticky-header, sticky-column, and in-place editing patterns across releases 6.0-6.2.
- Defined reusable interaction patterns and component specifications supporting large-scale enterprise products.

IBM — UX Design Intern — San Jose, CA — Sep 2018 - Aug 2019

- Reframed an AI governance tool from static reporting into a decision-support experience for reasoning about complex relationships.
- Designed a relational visualization system that made AI system behavior traceable, supporting transparency and informed decision-making.

Tetrate — Founding Product & Brand Designer — San Francisco, CA — Jun 2018 - Aug 2018

- Designed core workflows for an enterprise multi-cloud infrastructure platform, including onboarding, service inventory, and topology, translating distributed-system complexity into intuitive product experiences.
- Built the foundational brand identity and product visual language, supporting Tetrate's early growth through Series B.

(03) Education

M.S. Human Factors & Ergonomics (HCI Track), San Jose State University
B.Eng. Electronic Science & Technology, Harbin Institute of Technology
